Life. Elevated.

Symmetry Elevating Solutions
National Reach. Local Service.

Residential Elevator Catalog
Your Benefits.

Benefits of adding an elevator to your existing home or new residential construction:

Safety. By putting safety first, Symmetry Elevating Solutions builds the foundation for luxury, value, reliability and return on investment. We make your choice in home elevator providers AN EASY ONE!

Designing Luxury. Symmetry Elevating Solutions elevators are designed to be a beautiful, functional part of any home - and if you’d like, they can be designed to fit almost anywhere. Make yours a focal point of your new home, or incorporate it into the overall design of your existing one.

Designing Value. Symmetry Elevating Solutions delivers a premium quality, luxurious product custom-built to fit your lifestyle and your budget. Simply put, we give you more function and leave less of a ‘footprint’

Designing Reliability In Your Home. When stairs become an obstacle for someone you love, Symmetry Elevating Solutions can help. Let our dedicated team of elevator professionals build a solution that doesn’t involve selling your ‘dream’ home.

Solid Investment. A Symmetry Elevating Solutions residential elevator adds more than resale ‘appeal’ to your home - it will increase the resale value too! Architects and home builders understand the value of installing home elevators - so should you!
Complete Solution.

Our Focus:

+ Safety
+ Quality
+ Design & Sales Process
+ Construction & Project Management
+ Ownership Maintenance

Your complete lift solutions provider *
When it comes to home elevators, entrances are one of the most critical ingredients of a safe and reliable elevator system. There are two (2) separate parts of your entrance system: the elevator car door / gate system and the landing door system. The car system travels with the elevator; the landing door is stationary at each landing.

### Safety

### Standard Safety Features

- **Uninterruptible Power Supply (UPS)** provides battery powered lowering of elevator car in case of a power failure.
- **S.M.A.R.T. System** monitors the complete electronic functionality to ensure safe and proper elevator operation.
- **Enhanced Gate Bypass Monitor** actively monitors the elevator cab and landing entrances to regulate proper sequencing in the safety zone between the two entrances.
- **Motor Slip Protection** provides built in overload protection for IGD & Winding Drum motor and drive systems.
- **Motor Over-speed Monitor** shuts down elevator if it exceeds speed limits when traveling down.
- **Third Party Code Safety / Engineering Certification** reviewed by outside engineers to certify code and safety compliance.
- **ETL / Intertek Certification** ensures components for fire and electrical safety compliance.
- **Optional Raise UPS (IGD)** provides battery power to allow the elevator to travel up to next level of egress in the case of a power failure (up to 40’ at 20 fpm).
- **Remote Disable Switch** shuts down the elevator once existing calls are completed. ‘Key’ required to restart operations.

### Car Safety Options

- Symmetry safety door (manual or automatic)
- Scissor gate and enterprise gate (manual)
- Accordion door (manual or automatic)

### Landing Safety Options

- Door by others
- Door & frame package (power swing door operator optional)
- Door frame package
- 2 or 3 speed sliding landing doors (automatic)

See page 28 for more details on gate and door options.
Elevator Safety Packages

For convenience of selection, we have created six (6) exclusive Symmetry Safety Packages. Starting with a basic code compliant safety package all the way up to a Level 6 full commercial style residential elevator with single-touch automatic doors on cab and landings. Talk with your authorized Symmetry provider to go over which options will work best for your project.

Strong. Reliable.

**Symmetry** • noun  
=sym-ə-trē\ / beauty of form arising from balanced parts or proportions surrounding an axis.

For Symmetry Elevating Solutions, YOU are the axis!
Think you don’t have the space to install a home elevator?

Symmetry Elevator Solutions’ Inline Gear Drive Residential Elevator does not require a machine room - saving you space and money without sacrificing your safety.

This machine room-less elevator system runs at a speed of 40 feet per minute, has a load capacity of 1,000 lbs., and features our standard ‘exclusive’ additions, including emergency battery-operated lowering, COP and hall stations digital position indicators, custom wood sills and energy-efficient LED lighting.

An optionally equipped battery back-up system allows the elevator to travel up to next level of egress in the case of a power failure (up to 40’ at 20 fpm).

Visit our website at SymmetryElevator.com for a full list of standard and custom features.
Time tested, technology improved.

Based on early elevator lift assemblies, the Symmetry Elevating Solutions Winding Drum System utilizes heavy duty aircraft cables attached to a rotating drum. The drum is attached to a variable speed motor to move the elevator cab and ensure ‘smooth’ stops and starts.

With our advanced electronics package and in-house design engineered software and controller, the Symmetry winding drum elevator is the smoothest and quietest drum drive on the market.

This drive system accommodates up to six stops, 50’ of travel, and is equipped to hold up to 1,000 lbs.

Visit our website at SymmetryElevator.com for a full list of standard and custom features.
When it comes to residential elevator systems, **hydraulic drives** are a popular choice for homeowners looking for quality, safety, and the ‘quietest’ ride.

Hydraulic systems utilize a ram or piston to raise and lower the cab by filling or releasing fluid into an airtight cylinder. With more standard features and custom options than any other elevator on the market today, Symmetry’s Hydraulic Drive Residential Elevator system is the industry leader.

Unique in the market, no other company offers emergency battery-operated lowering, COP and hall stations digital position indicators, custom wood sills and energy-efficient LED lighting as *standard features*.

This drive system accommodates up to six stops, 50’ of travel and is equipped to hold up to 1,000 lbs.

Visit our website at [SymmetryElevator.com](http://SymmetryElevator.com) for a full list of standard and custom features.
The latest residential elevator offering from Symmetry Elevating Solutions.

**LUXURY REDEFINED** is the designated flagship model of our residential elevator line. It is designed as a heavy-duty luxury elevator. With its single-touch operation, and smooth operating fully automatic side sliding doors, it makes operation of your luxury home elevator - effortless!

With the perfect combination of form and function, this elevator utilizes the lifting mechanism, controls, and features of a small commercial elevator. Fully customizable interiors, finishes, and fixtures, this elevator boasts a full array of home style and décor integration.

**LUXURY REDEFINED** comes with your choice of hydraulic drive systems:
- 1000 lb. capacity with up to 7 stops, 50’ of travel, and a travel speed of 40 FPM.
- 1400 lb. capacity with up to 7 stops, 35’ of travel, and your choice of:
  - 3 horsepower motor
  - Travel Speed of 30 fpm
  - 5 horsepower motor
  - Travel Speed of 40 fpm

**LUXURY REDEFINED** is a fully code compliant automated elevator and comes with automatic "commercial style" doors.

The wide selection of cab finishes and options ensures that it will blend into any setting.

Visit our website at [SymmetryElevator.com](http://SymmetryElevator.com) for a full list of standard and custom options.

**Symmetry**

Elevating Solutions

15

The Symmetry Elevating Solutions team believes that any elevator should fit your home, style, and needs.

With all the options available from a Symmetry Elevating Solutions elevator, you’ll be sure to get a home elevator installation that will not only blend seamlessly into your dwelling, but enhance its style and livability.

The CHOICES are YOURS!
With American-made quality, beautiful craftsmanship, expert engineering, and thoughtful construction, Symmetry Elevating Solutions is the residential elevator of choice.

After selecting a drive system, it’s time to start customizing the design of your home elevator, beginning with the interior cab.

Elevator cabs come in various sizes (as small as 12 square feet and as large as 18 square feet) with numerous options and accessories.

Match the style and quality of any home with standard options (Birch, Oak, Maple) or additional options (Alder, Cherry, Walnut, Hickory, Mahogany or White Oak). The possibilities are endless.

- **Classic Cabs**

- **Custom Cabs**

  Recessed LED Lights with Trim - These low voltage LED lights are stylish and energy efficient. Standard package includes two (2) fixtures. Four (4) fixture options available. Finishes in Nickel, Polished Brass, Black, and Vintage Bronze.

  Ceiling Options - Match your ceiling to the look, style and wood species of cab walls. Available in flat panel ceiling or custom ceiling to match optional cab wall panels. Shown here in a Red Oak with Traditional Cherry finish.

  Interior Fixtures - Flush mount Car Operating Panel (COP) and recessed Phone Box are offered in a standard Brushed Stainless Steel finish or select from six (6) additional finishes including Black, Oil Rubbed Brass, Vintage Bronze, Brushed Brass and Polished Brass, or Stainless Steel.

  Hand Rail - Provided with a solid wood handrail created to match the existing cab wood species. Optional luxury metal handrail in seven (7) finishes to match the elevator interior.

  Cab Interior - Select from our four (4) beautifully crafted interior panels including Flat (standard), Shaker, Raised Panel or Recessed Panel (shown with Traditional Cherry finish). Custom interior finishes available.

  Flooring - Unfinished plywood flooring with sill (standard) allows for installation of ¾” flooring to match or enhance your home’s design plan.
Design Options

Flat Panel
Our standard and most affordable option, the Flat Panel Cab style offers smooth, flat veneer interior walls with matching ceiling panels and matching wood car sill in one of three (3) standard or six (6) custom wood finishes.

Shaker Panel
The wide panel design of the Shaker style cab is both simple and modern. Its clean lines and artisan-style craftsmanship make this design style a great choice to compliment any new or pre-existing home decor.

Recessed Panel
The design for this cab panel is subtle, clean, and makes for a very simply stated yet beautiful cab panel. The beveled edge in the wood panel creates a recessed panel look and feel.

Raised Panel
Luxury, beauty and versatility. Our Raised panel cab offers a two-dimensional beveled edge within a router tongue and groove frame. Framed in with raised molding this is our most elegant cab wall.

Cab Panel Options

Cathedral
- Panel
- Paint Grade
- MDF - Arch & Frame

Craftsman
- Picture Framing (Applied molding trim)
- Grand Trim

Monarch
- Shaker Panel
- Arched Top

Marquis
- Picture Framing
- Petite Trim
Provided unfinished, stained or clear coated in three standard woods with unlimited options of additional wood species. The flat panel cab is a versatile model for integral design and personal cab finishes. This car features matching walls, ceiling, car sill and a standard solid wood handrail. Available with any of the Symmetry fixtures and finishes for COP, handrail and hall stations. Standard with two (2) LED lights or optional four (4) LED lights.

“My husband and I had a Symmetry Elevating Solutions elevator installed in our home. Using the flat panel cab allowed our finish carpenter to match our home’s décor identically. It looks like part of our home.”

– Sable Montgomery
Miami Beach, Florida
With the Shaker style finish, and the raised panel molding, this cab finish is designed to match any coastal style home or the traditional Shaker style decor. With furniture grade wood working cab finishes, and the attention to detail all your home fixtures and finishes deserve, the Shaker panel will be a design complement to your residence. Available with all the Symmetry fixture finishes and cab materials, it is only limited by your design imagination.

“When we realized we needed to add an elevator to our home, we were worried that it would be an eyesore. Symmetry not only helped us create the elevator we needed, but one that fit the style of our home perfectly.”

– Robert Weber
Houston, Texas
With this distinctly crafted, hand finished elevator cab, the Symmetry craftsmanship is quickly noticed. This model features custom paneling and recessed panel finishes to add depth and contour to your elevator wall panels. When a detail finish is what your design requires, this is your cab selection.

Available with all the Symmetry fixture finishes, cab materials, and style selections. This elevator cab is designed to meet the most discerning of styles, and complement the existing environments of your highly detailed residences.

“Symmetry’s many cab options allowed us to create an elevator that has become a focal point of our home. Our Symmetry dealer worked directly with our designer to pick the perfect finishes, they made it really easy for us to get what we wanted.”
– Jordan Prickett
Malibu, CA

Concealed fasteners on interior cab finish for luxury detailed finish
Our elite trimmed elevator cab is beautifully finished, hand crafted, and will present our rich wood selections with the elegance and pristine reflection of your home decor.

With the Symmetry exclusive matching car sill, overhead valance, and the absolute highest quality residential elevator cab on the market, our Raised Panel cab is the premiere cab selection to perfectly complement any luxury home.

“I am very happy with my Symmetry elevator. It allows me access to the other half of my home and even matches the woodwork throughout the rest of my beach house.”
– Barbara Tripp
Norfolk, Virginia

Symmetry Exclusive
Engineered cab brackets:
These brackets ensure a perfect fit for your elevator cab along with adding superior rigidity.

- Maple
- Birch

Optional
- Alder
- Cherry
- Hickory
- Mahogany
- Walnut
- White Oak

Stains
- Traditional Cherry
- Clear Coat
- Golden Oak
- Country Pine

Metal Finishes
- Polished Stainless
- Polished Brass
- Brushed Stainless
- Brushed Brass
- Vintage Bronze
- Oil Rubbed Brass
- Black
Options

Car Operating Panel (COP) boasts stylish, flush mount features: digital floor display, illuminated floor selection buttons, and emergency stop and alarm controls. Available with standard Brushed Stainless Steel finish or any of our six optional finishes. Also available in matching wood style.

Interlocks ensure elevator doors are safely closed before operation of elevator. They are mounted in the frame of the hoistway door. Standard interlock is White. Optional covers available in Brushed Stainless Steel, Vintage Bronze or Black finishes.

Phone Box discretely conceals emergency communication equipment (ie. Phone) inside the elevator cab. Designed to match the look and style of the COP, the recessed Phone Box comes in standard Brushed Stainless Steel finish or any of our six optional finishes.

Hall Stations are flush mounted at each landing. Keyless operation activates elevator, calling it to your floor when button is pushed and illuminated. Digital LED display shows car’s location. Available with standard Brushed Stainless Steel finish or any of our six optional finishes.

Specialty Options are bold and functional. The integrated COP streamlines multiple non-standard options such as emergency phone and security key switch into a single fixture. We can keep the design footprint small with a ‘slimline’ COP or ‘simple’ hall station button without the digital display. Available with standard Brushed Stainless Steel finish or any of our six optional finishes.

Recessed LED Lights with Trim offer low voltage Light Emitting Diode (LED) lights. Turn on automatically when elevator door is opened and remain on while in use. Lights turn off automatically. Standard Black finish or optional Polished Brass, Brushed Nickel or Bronze finishes.

Hand Rail options add both ‘safety’ and ‘style’ to your elevator’s design. Select a standard wooden rail to match the cab interior. Or select an optional metal rail available in any of our seven metal finishes.
Two and Three Speed Automatic Elevator Doors.

The look and convenience of a commercial elevator, designed with custom interiors to match your home. Automatic, single-touch entry side sliding doors are available in stainless or beige painted steel to allow complete matching to your existing home colors and décor.

Two and three speed doors are available in two configurations:

• Elevator Car Door Only. Integrates with existing swing doors in your home for a more traditional look. Compatible with Symmetry provided hoistway door package.

• Elevator Car Door & Hoistway Landing Doors. Fully automatic, single touch opening.
Car Gate and Door Options.

With multiple gate and elevator car door options, each Symmetry residential elevator can be packaged with one of our Safety First, residential elevator car and landing gate selections. Our offerings are available in manual or power operating (excluding scissor & enterprise gates):

- The Symmetry Safety Elevator Car Door - New industry leading design 3 panel side sliding door. Available with standard black doors or optional white, vintage bronze and stainless steel selections.
- Standard Scissor & Enterprise Gates - With light curtain safety sensors (manual only)
- Accordion Doors - Available in hardwood veneer, laminate, clear acrylic, bronze acrylic, and aluminum
- Wrap Around Tambour Style Doors - Side slide roller enclosure wraps around the cab exterior, providing a larger walk-through opening.
Beautifully Crafted, Expertly Engineered, Thoughtfully Constructed - In the USA
After years of frustration with a manufacturing industry that lacked both innovation and quality, a handful of the country’s premier home elevator companies shared their thoughts and ideas for a better elevator and the idea of the Symmetry residential elevator emerged.

The product requirements would be few, but non-negotiable. A Symmetry product must be beautifully crafted. It must be expertly engineered. It must be thoughtfully constructed. And it must be affordable.

When we boldly approached the industry’s finest engineers, largest distributors and most talented craftsmen with the idea, we were not surprised to receive reactions of overwhelming excitement.

We’ve taken that idea and expanded it to develop a shared goal with our manufacturing partner Bella Elevator - an unwavering, relentless, honest pursuit of excellence.

Quality.
Like all things Symmetry, our story is unique. There is little that is traditional about Symmetry Elevating Solutions, save for the fact that it was born out of a great idea - an idea that has remained the core focus of every decision, innovation and customer product that has followed.

Aerial view of our manufacturing facility in Peoria, Illinois. 63,000 square feet of dedicated elevator and lift manufacturing.

From our factory in Central Illinois to our corporate headquarters in Central California, the Symmetry Elevating Solutions team is committed to providing you with the best product to meet your project needs - on time and within your budget.
Partners. Team.

Whether you’re looking at new construction or retrofitting an existing home, you’re looking for craftsmanship and long-term quality, Symmetry Elevating Solutions measures up. All of our elevators are custom-built, pre-fit and Made in America. The people who design, engineer and mandate the highest quality of manufacturing include members of National Association of Elevator Contractors (NAEC), National Association of Home Builders (NAHB), Association of Members of the Accessibility Industry (AEMA), American Society of Mechanical Engineers (ASME) and Associated Builders and Contractors (ABC).

At Symmetry, we are prepared to sell, service and support you and your project needs. With over 80 physical brick and mortar locations in the Symmetry network in North America alone, we employ hundreds of the industry’s leading sales and product engineers to ensure proper care of your project and your equipment from the start of the sale through service for the life of the product.

Our team has installed and serviced elevators for decades. With tens of thousands of lifts and elevators across North America, we know why *quality matters*.

Warranty

Symmetry Elevating Solutions and its authorized dealers offer the following warranty.

Symmetry Elevating Solutions warrants the Roped Hydraulic, InLine Gear Drive, and Winding Drum Residential Elevators to be free from defects in material and workmanship under normal use and service for a period of three years. This warranty applies to the original purchaser only. The warranty commences with the date of shipment. The warranty card must be returned to Symmetry Elevating Solutions within 30 days from the date of original purchase in order for this warranty to go into effect.

Warranty Limitations: The foregoing warranty is the sole and exclusive warranty provided by Symmetry Elevating Solutions, and is in lieu of all other warranties, written or oral, express or implied, arising by operation of law or otherwise. Including but not limited to, warranties of merchantability and fitness for a particular purpose, whether or not the purpose has been disclosed and whether or not the elevator has been specifically designed or manufactured for buyer’s use or purpose.

This Warranty does not extend to any losses or damages incurred as a result of any of the following: failure to comply with recommended maintenance as outlined in maintenance schedule in Owner’s Manual, installation or service by a non-certified technician, misuse, neglect, accident, abuse, user’s negligence, improper operation (operation not in accordance with User’s Manual), fire, flood, acts of God, ordinary wear and tear, and damage during shipment, improper assembly, care or maintenance if performed by any individual other than an authorized representative.

The remedies provided under this Warranty do not extend to minor mechanical adjustments (such as tightening of nuts, bolts and screws).

Maintenance Schedule Requirements

The Symmetry Elevating Solutions elevator systems are required to be maintained and inspected a minimum of two (2) times per year by an authorized Symmetry Elevating Solutions dealer.
