

Wheelchair Accessible Elevator Planning Guide

The questions below will assist you in preparing for your conversation with your local home elevator company to plan the installation of your wheelchair accessible home elevator.

Is the wheelchair a temporary or permanent device?

What is the style of the current wheelchair?

What is the size of the wheelchair?

Will the style of the wheelchair chair change in the future?

Will the wheelchair need to be accompanied by another individual?

Can the wheelchair user reach the Car Operating Panel and Hall Call?

What is the turning radius of the wheelchair?

Ideally, where would the elevator be installed and would the configuration be 90 degree, straight-through or enter/exit same side?
